BioFit specialized ergonomic seating solutions

Selecting the right chair is a big deal — just ask the person who has to sit in it all day. An ergonomic chair can improve everything from posture to focus to work output. If people are comfortable while they work, they will work more efficiently. BioFit offers product lines designed specifically for use in laboratory and healthcare environments. We'll find seating that suits your staff and your workplace.

Ergonomics at work

A properly designed workstation can provide maximum efficiency and durability. BOSTONtec workstations have options to lift, tilt, rotate, and slide for better task positioning. Work stations feature height adjustability to support the 5th through 95th percentile employee in a seated posture and can be made with laminate, stainless steel, phenolic resin or epoxy surfaces.

Metro Shelving

Metro sterile wire shelving will help organize and contain products. Metro's fixed and mobile options can also help reclaim wasted space. Stainless steel wire shelving provides corrosion resistance and is chemically resistant to a wide range of acids, alkaloids and solvents.

Kraftwerks Healthcare Solutions
We can help!

What is a clean room?

Having a clean room, doesn't just mean the janitorial staff has done their daily sweep and wiped down surfaces. A clean room is one with a controlled environment that has a low level of pollutants such as dust, airborne microbes, aerosol particles, and chemical vapors.

Clean rooms have undergone a combination of engineering design, fabrication, finish and operational controls so they meet the requirements of the GMP (Good Manufacturing Practices) code.

Did you know....

Kraftwerks has experience helping clients in the pharmaceutical industry with their clean room needs? If you are interested in creating or updating a clean room, [contact us](#) - we can help!
