CAPABILITIES / COMPETENCIES

Kraftwerks, Inc provides turnkey, advanced design and organization services including layout, engineering, product procurement, installation and preventative maintenance for organizations challenged by space and/or production limitations — optimizing existing or new space.

- **Storage:** Shelving, Cabinets, Racking Systems (all types), High Density Mobile Aisle Shelving, Modular Drawer Cabinets, Technical Furniture, CNC Tool Storage, Evidence, Records, Shop Furniture, Lockers
- **Materials Handling:** Fulfillment, Ergonomic Pick and Pack Workstations, Work Positioners, Automated Conveyors, Cranes, Hoists
- **Mezzanines/Catwalks:** Freestanding and Modular, Single and Multi-Story
- **Prefabricated In-Plant & Office Panel Systems:** Clean Rooms, Security Gates and Enclosures, Safety Barricades
- **Automated & Retrieval Storage (ASRS):** Ergonomic Vertical Lift (VLM) and Carousels with Supply Chain Inventory-Management Software, Secure Access Code Management, Controlled Environment Chamber for Product Storage, Parts In-Process, Files, Other Items
- **Laboratory Furniture:** Casework, Fume Hoods, Bio-Safety Cabinets
- **Other Processes:** Steel Fabrication, Electrostatic Painting

SERVING

- Private • Hospitals • Research • Commercial
- Public • Medical • Utilities • General Contractor
- Government • Education • Transportation

PROFESSIONAL SERVICES

- Needs Assessment
- Design & Engineering
- Project Management

CSI CODES & DESCRIPTIONS

05500 Metal Fabrication (sub: 05520)	10250 Service Wall
10500 Lockers (sub: 105000, 10505, 10510)	11600 Laboratory Equipment
10600 Partitions (sub: 10605, 10610, 10615, 10650)	116800 Playfield Equipment & Structures
10670 Storage Shelving	12300 Manufactured Casework (sub: 123000, 12304, 12310, 12320, 123400, 12350, 123600)
10100 Visual Display Board (sub: 10110, 101100, 10115)	13030 Special Purpose Room
10150 Compartments & Cubicles (sub: 10155, 10160, 10165, 10170, 10185)	14500 Material Handling

FSC CODES & DESCRIPTIONS

3460 Machine Tool Accessories	4940 Miscellaneous Maint. & Repair Shop Specialized Equip.
3694 Clean Work Stations, Controlled Environment, Related Equip.	4970 Multiple Guided Weapons, Specialized Maint. & Repair Shop Equip.

332311 Prefabricated Metal Building & Component Manufacturing	423440 Other Commercial Equipment Merchant Wholesalers
332618 Other Fabricated Wire Product Manufacturing	423490 Other Professional Equipment & Supplies Merchant Wholesalers
332999 All Other Miscellaneous Fabricated Metal Product Manufacturing	

KRAFTWERKS' PORTFOLIO

**PINE PHARMACEUTICALS, Tonawanda, NY Ongoing
Optimization of Process Flow, Storage and Space, and Organization of Raw Materials, WIP, and Finished Products**

Installed casework and furnishings in the prep, ante, ISO/sterile compounding and clean rooms. Installed casework and furnishings in the QC labs; gowning; locker rooms; quarantine, packaging, shipping, receiving; and warehouse areas. Improved efficiency in all areas of the facility.

**IVOCLAR VIVIDENT, Buffalo, NY Ongoing
Dental Product Distribution Center**

Took advantage of underutilized 'overhead' space by installing customized storage mezzanine. Developed and planned relocation of product line(s) on one weekend day (6 hrs). Increased aisle space and work areas by over 300%.

**NIAGARA FALLS BRIDGE COMMISSION, Niagara Falls, NY 2019
Expansion Project**

Installation of lockers, bathroom partitions, bathroom accessories, entryway mats, and display cases, as part of a large expansion project that included a new administrative and processing facility with more modern amenities.

**JOHN R. OISHEI CHILDREN'S HOSPITAL, Buffalo, NY 2018
Solution for Storage of Sterile Surgical Instruments/Wraps**

Installed three high-end vertical carousel storage systems with wireless barcode scanners — able to store everything from soft goods to sterile storage cases — utilizing existing space. Linked carousel's control system, which interfaced with hospital's tracking system. Changed delivery of instrument cases — for verification and transport to surgical procedure manager (SPM) techs — to one at a more ergonomic, counter-height level. Eliminated the need for reaching and bending during storage and retrieval functions.

**STEUBEN FOODS, Elma, NY 2018
Aseptic Food Development Lab Enlargement/Expansion with Food/Beverage Photography and Training Areas**

Selected, designed (with new infrastructure), and installed — according to detailed architectural drawings — state-of-the-art, modern and highly functional lab. The lab included fixed casework and modular workstations with rolling cabinets; fume hoods and snorkels; ceiling panels and service carriers; and quick-disconnect, twist lock, electric-keyed quick-connect fittings and extension service hoses designed to deliver electric, gases and data services to the lab benches.

**UB RENEW, Amherst, NY 2018
Lab Renovation**

Selected, designed, and installed state-of-the-art, modern and highly functional lab including fixed casework and modular workstations with rolling cabinets; fume hoods and snorkels; ceiling panels and service carriers; and quick-disconnect, twist lock, electric-keyed quick-connect fittings and extension service hoses designed to deliver electric, gases and data services to the lab benches. Integrated energy and sustainable performance by looking at operational energy impact of architectural design decisions and using efficient mechanical and electrical systems.

**VAN BORTEL SUBARU, Victor, NY 2018
State-of-the-Art Service Area for Newly Built Car Dealership**

Developed a solution utilizing high-quality (yet affordable) durable, heavy-duty automotive service equipment, working within a compressed timeline. Dealership opened ahead of schedule.

**UR MEDICINE HIGHLAND HOSPITAL, Rochester, NY 2017
Space Optimization for Storage of Heavy-Duty Hospital Beds to Meet NFPA101 Life Safety Code Regulations**

Identified specialized vendor with product able to support the massive size and weight of hospital bed inventory. Engineers and planners addressed the key storage problem, while staying within budget and ensuring the intended result and the best value and ROI. Tripled storage capacity from 4 to 12 beds, while reducing storage space utilized by 50%.
