

# Close the Lid on Contamination from Mobile Devices.

Portable items – from tools, to HT radios, to smartphones – often slip through critical control points un-sanitized. These items are proven reservoirs for bacteria, undermining hand hygiene and increasing the risk of cross-contamination in sensitive production areas.

CleanSlate UV allows facilities to quickly sanitize a range of portable devices without the use of chemicals. The intuitive, 30 second solution can be deployed alongside hand-washing stations, seamlessly integrating into HACCP protocols.

Kraftwerks is pleased to partner with CleanslateUV and bring you sanitizers to help you keep your workplace safe. Please call or email us for pricing and service

**KRAFTWERKS**

Creating space. Maximizing productivity. Since 1990.

### 30-Second cycle

kills 99.999% of MRSA while staff wash their hands.

### Prevent re-contamination

of clean hands with touch-free device removal.

### Chemical-free sanitization

of portable electronics and tools, including walkie-talkies, smartphones and tablets.

### Sanitizes multiple devices at once,

seamlessly integrating into existing workflow and HACCP protocols.

---

#### Pathogenic Kill Rate @ 30 Secs

- C. difficile spores – 99.93% reduction
- MRSA – 99.9991% reduction
- Salmonella (S. enterica) – 99.992% reduction
- Listeria (L. monocytogenes) – 99.96% reduction

*\* 3rd party lab efficacy report available upon request*

#### Specifications

- Size: 26.9" x 14.9" x 12.2"
- Tray: 9.5" x 11.3" x 4.5"
- Desktop Footprint: 15.7" x 14.9"
