### Technology Storage

In today's business technology is important, and secure storage of technology products is vital. But another important piece, one that often proves to be a nuisance, is keeping devices charged.

Datum offers a variety of products to securely store technology products, while keeping them charged at the same time. Datum's American-made products meet rigorous ISO-9001 quality standards and are made with high-grade steel and durable powder coating.

Here are some of the secure technology store and charge products Datum offers:

- **TekCart™ GLC** – Portable cart with AC power for laptops, iPad, Chromebooks & tablets
- **TekCart™ Prime** – Portable cart for laptops, iPad, Chromebooks & tablets with Intellego™ Smart Timer
- **TekCart™ Universal** – Portable maximum capacity cart for laptops, iPads, Chromebooks & tablets with AC power & advanced timer
- **TekCart™ Classic** – Portable compact-sized cart for laptops, iPads, Chromebooks & tablets
- **Tekstak™ II** – Cabinet for iPads, Chromebooks, laptops, tablets, e-readers, & phones with AC and USB charging
- **Laptop™ Depot Cart** – Compact, portable cart for laptops, iPads, Chromebooks & tablets
- **Netbook Depot** – Portable cabinet for netbooks & tablets
- **Laptop Depot** – Portable small capacity laptop cabinet
- **Laptop Depot Tower** – Cabinet for laptops, iPads, Chromebooks & tablets
- **Laptop Depot Pedestal™** – Compact, portable/mountable cabinet for laptops, iPads, Chromebooks & tablets
- **Laptop Locker** – Individual laptop storage

Kraftwerks has recommended and installed Datum products in a variety of applications. Ask us and we'll find a suitable product!

Other Datum products:

- High density storage
- Filing systems and storage
- Weapons storage
- Lockers

### Can Lockers be Smart?

Today's economy involves a lot of package deliveries of all types — and package theft can be a problem. If you are a property manager, the constant need to sign for and accept packages for residents, as well as managing all the work involved with alerting residents to deliveries and handing out those packages at all hours of the day is a time drag.

Package management can be easy with Luxor One smart lockers from GS Parcel — they do the work for you. Carriers deliver packages to the lockers using their secure access code. Recipients are notified digitally and provided with a secure barcode. Recipients retrieve packages using their secure barcode at the locker, which triggers the appropriate access door to automatically open for the recipient. Video surveillance ensures delivery is secure.

- Heavy-duty corrosion-resistant 12-gauge steel
- Tamper-proof modular doors
- Internal hinges
- Key-free master lock combination
- User intuitive iOS-powered touch display
- ADA standard universal access
- Cloud-based video surveillance
- Available for indoor & outdoor

### Moveable, Modular Space

Regardless of what industry you are in, there is likely an office in your space. Brick and mortar offices can only utilize the footprint in which they exist. If you need to utilize that space in a different way, you'd have to repurpose it or tear down walls.

A modular office can be moved and repurposed by simply disassembling its walls and reassembling them elsewhere. Plus, they can be reconfigured into new offices, enclosures or room dividers, making them more versatile and cost effective.

InPlant's offices and equipment enclosures are constructed of 1 1/4" or 3" thick painted steel, or 3" thick anodized extruded aluminum. Fabricated buildings can be multi-story, utilizing previously unavailable vertical space, and roofs can be load bearing up to 125 pounds per square foot making them usable for storage or production areas. InPlant's equipment enclosure systems are designed to accept safety accessories such as laser protective glazing, computer programmed door controls, interlocks, and more.

- Modular office partitions, wall panels, & building systems
- Modular office buildings with roof storage
- Warehouse, employee, multi-purpose prefab, & mezzanine offices
- Oversized portable office buildings
- Controlled environments: packaging rooms, laboratories, clean rooms, & grow rooms
- Vision towers
- Custom guard shacks, security & parking booths (fully assembled)
- Equipment & laser safety barriers, & portable equipment enclosures
